SUMMARY

Frontend Developer with **2+ years** of experience in building responsive and scalable web applications using **React.js, JavaScript, TypeScript, Fluent UI, Redux, Unit Testing, SPFx** and **REST APIs**. Experienced in developing enterprise applications, reusable components, CRUD operations, dashboard development, workflow automation (Power Automate), and API integrations.

KEY SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS

Frameworks/Libraries: React.js, NextJs, Redux, Bootstrap, Tailwind CSS, Fluent UI, Chart.js, Material UI

React Ecosystem: Context API, React Router, Custom Hooks, React Hooks, useState, useEffect, useCallback, useMemo, React.memo

Integrations & APIs: REST APIs, SharePoint REST APIs, Zoho Sign API, Zoho Books API, SharePoint Framework (SPFx)

Automation & Tools: Jest, Microsoft Power Automate, Git, GitHub, Vite, VS Code, Azure Services, React Testing Library

WORK EXPERIENCE

Software Development Engineer, Cubic Logics Pvt Ltd | Bangalore Revenue 365 Application

May 2024 – June 2026

- Developed and maintained enterprise invoice management features using React.js and TypeScript, including invoice preview, filtering, reporting, PDF generation, licensing/subscription management, and Customer Success Journey modules.
- Built reusable and scalable UI components using React.js and Fluent UI for enterprise workflows and responsive business interfaces.
- Implemented application state management using Redux, Context API, React Hooks, and custom hooks.
- Integrated REST APIs and SharePoint REST APIs for real-time financial data retrieval, persistence, and business workflows.
- Led an SPFx upgrade from v1.21.0 to v1.22.1, resolving Heft migration, TypeScript strict-mode, and build-pipeline issues.
- Maintained approximately 85% unit-test coverage using Jest across invoicing modules.
- Integrated AI-powered chatbot functionality using Copilot and Azure OpenAI to assist users with billing and invoice-related queries.
- Used GitHub Copilot and Claude Code to accelerate development, debugging, and implementation workflows.
- Performed root-cause analysis for critical production issues and worked with backend and QA teams to deliver reliable fixes.
- Participated in client support calls to understand data discrepancies and developed JavaScript scripts to transform and correct client JSON data.
- Collaborated with cross-functional teams throughout Agile development, testing, deployment, and production-support cycles.

Timesheet 365 Application

- Developed and maintained time-tracking features in React.js/TypeScript, enabling daily/weekly time entry, project- and activity-based reporting, and historical activity overviews.
- Built reusable, company-standard UI components and responsive forms using React.js and Fluent UI, implementing CRUD operations, filtering, modals, and dashboards for time-entry screens.
- Managed application state using Context API and React Hooks and integrated REST/SharePoint REST APIs for real-time data retrieval and persistence.
- Optimized reusable components and frontend workflows to improve loading speed and UI responsiveness across daily/weekly timesheet views.
- Collaborated with backend and QA teams in Agile sprints, optimizing reusable components and frontend workflows to improve UI responsiveness.

EDUCATION

B.Tech, Computer Science & Engineering

June 2020 – July 2023

Satyasai Engineering College

- Percentage: 78.50%

Diploma in Computer Science

June 2017 – May 2020

BHUBANANANDA ORISSA SCHOOL OF ENGINEERING

- Percentage: 78.00%
